***Abstract***

This study focuses on deixis in pragmatics. This study aims to determine the types of deixis in the Avengers: End Game film and to explain the function of each type of deixis based on the deixis theory of Levinson (1983). The object of this research is utterances containing deixis in the movie Avengers: End Game. In this research, the method used in analyzing the data is a qualitative descriptive method, so that the results of this study are described descriptively and in detail, not in the form of numbers. This study resulted in findings in the form of five types of deixis in Avengers: End Game based on Levinson's (1983) theory, namely person deixis, time deixis, place deixis, discourse deixis, and social deixis, besides this research shows the function of each deixis, namely designates an object.

**INTRODUCTION**

In everyday life, language is something that makes people different from other living creatures, and language is needed by peoples to communicate among others. According to Isti'anah (2016:8), "*there are two forms of language, such as written language and spoken language. The written language could in the form of non-literary and literary works*".

The spoken language could be in the form of a daily conversation. In conversation, people do not say directly and sometimes people say different from the intention they conveyed to others. Bach (2012:1) states that *“A speaker can say something without meaning it, by meaning something else or perhaps nothing at all. A speaker can mean something without saying it, by merely implicating it”*. Therefore, to understand the purpose of a conversation requires a context. Context be in the form of place, time, and how the culture in the language in the conversation is spoken to avoid miscommunication. Besides, the context can make the listener understand the purpose of the conversation and the conversation is going well.

Levinson (1983:9), state that Pragmatics is basic study in understanding the relationship between language and context. The benefits of learning Pragmatics is to understand the intended meaning, purpose or assumptions of the speaker. In daily conversation and a text often found deixis. Deixis explains the language structure that reflects the relationship between language and the context itself. Deixis also describes how language is coded and how to interpret a speech based on an analysis of the context of the speech.

According to Levinson (1983:62), Deixis consists of five types, including person deixis, time deixis, place deixis, discourse (text) deixis, and social deixis. Deixis is often found in everyday conversation, and also in a literary work, for example, a film. Levinson (1983:54) also states that deixis is an activity to understand the meaning of a word or phrase in a speech, and in understanding this meaning, a contextual phenomenon is needed. In addition Yule (1996:9), Deixis can be defined as designating something using language. Based on two statement above deixis has function to point something, such as person, place, time, processes object, event, etc.

The focus of this study is deixis in Avengers : End Gam by Marvel Studios, which are some reasons that make this film interest to analyze, such as this film is booming in all circles; children, adolescents, and even adults. Besides, the conversation in this film contains conversations that are similar to everyday conversation such as offering something, asking for something, asking, or answering a question., this film contains deixis also. Another reason is that the film Avengers: End game is a continuation of the film Avengers: infinity War, because of that there are several utterances in the film Avengers: End Game which refer to a character or an incident in the film Avengers: infinity war.

Based on the explanation above, it can be concluded that this research is important to do because it is useful for adding insight and understanding to a speech, such as who is appointed in an utterance, and what is the meaning and purpose of the utterance, besides that the conversation will run more smoothly if the speaker and listener understand the meaning of each other's utterances. In this study, there are several differences from previous studies, one of which is that the previous research only focused on the type and function of the deixis without explaining how to know the function of the deixis, whereas in this study the context of the conversation was explained first so that it could conclude the function of the deixis in a utterance.

## **RESEARCH METHODOLOGY**

This research uses a descriptive qualitative method and has several stages of analysis. The following is the explanation:

### **Type of Research**

This research used descriptive qualitative method. According to Creswell (2009:1), Qualitative study is study in the form of an approach to explore and understand the meaning of individuals and groups that are related to social or human problems. Qualitative study usually has a process that contains questions and procedures. Data is collected in the form of participant arrangements, data analysis is carried out inductively by building from the smallest details to a general theme, then the study interprets the meaning of the data. The data analyzed and explained in a descriptive way (using words), not in numbers. The kinds and functions of deixis which found in this study were explained in descriptive.

### **Subject of the research**

This research uses a film titled Avengers: End Game as the subject of study. This research focuses on the utterances of the characters in film Avengers: End Game which contain deixis.

### **Data Collection**

This study used data in dialog form in the movie Avengers: End Game by Marvel studios. There are some steps to obtain valid data as stated below:

- a. Watching the film Avengers: End Game.
- b. Looking for the script and match with the film.

- c. Collecting the data that contain deixis.
- d. Grouping data by type of deixis, such as person deixis, place deixis, time deixis, social deixis, and discourse deixis.
- e. Reducing data it aims to avoid the same finding.

### **Data analysis**

Thirty-three utterances from the Avengers: End Game are used as the data for analysis. The data were selected randomly based on the type of each deixis. Data have been selected will be analyzed using theory. The stages are as follows:

- a. Identify the type of the deixis such as; person deixis, time deixis, place deixis, discourse deixis, and social deixis.
- b. Identify the function of deixis.
- c. Analyze and describe the contextual meaning of deixis based on physical context, linguistic context, social context, and epistemic context.
- d. Make conclusions from findings.

## **FINDINGS AND DISCUSSION**

According to Levinson (1983) there are five types of deixis including person deixis, time deixis place dixis, discourse deixis, and social deixis. other than that the function of deixis is to point something. in this study there are 33 data that will be displayed. The data has gone through the selection stage, this is done so that there is no repetition of data with the same findings.

### **1.1 First person deixis**

First peson deixis is the word spoken by the speaker to point to himself. The word "I" is the subject and is a singular pronoun, the word "me" is an object and the word "my" is a word that refers to ownership. The sentence was spoken by Thor. The word "your majesty" in the utterance belongs to absolute social deixis. The function of the word "your majesty" in the above statement is to point Valkyrie.

## CONCLUSION AND SUGGESTION

### Conclusion

This study found five types of deixis and their functions, the five types include person deixis, time deixis, place deixis, social deixis, and discourse deixis with a total of 1,778 data. Person deixis is divided into three kinds, they are; first person deixis, second person deixis, and third person deixis. The function of deixis is to point object such as people, places or times. The reference depending on the context of the sentence or utterance.

### Suggestion

After concluding the contents of this study, there are few suggestions to the readers, especially to English literature students. To other researchers who want to analyze deixis, it is suggested to use other data such as short stories, mantras, or speeches. Other researchers who want to analyze deixis are advised to use other data such as short stories, mantras, or speeches. The aim is to find new findings that can be used as a comparison and as an additional reference for other researchers. The next

researchers can connect the deixis theory with other studies for example, it can be connect with semantics, sociology, psikology, or language and culture. For further researchers who are interested in analyzing deixis, it is hoped that they can provide a more detailed explanation of deixis in order to help other students understand the types of deixis and the functions of deixis in a sentence or utterance.
